

# Tarush Singh

+1 (513) 857 8501 - [Portfolio](#) - [singh.tarus@northeastern.edu](mailto:singh.tarus@northeastern.edu) - [LinkedIn](#) - [GitHub](#) [Medium](#)

## EDUCATION

### Northeastern University

*Masters of Science in Information Systems*

Boston, MA, USA

Sep 2022 - Apr 2024

- Relevant Courses: Neural Network Architecture, High Performance Parallel ML, Data Science engineering

### SRM Institute of Science and Technology

*Electronics and Communication engineering*

Chennai, TN, India

Aug 2014 - Apr 2018

- Relevant Courses: Intro to Robotics, Data structures and Algorithms, Soft Computing

## TECHNICAL SKILLS

**Programming Languages:** Python, C/C++, Java, HTML, SQL

**Libraries and Tools:** Tensorflow, PyTorch, Sklearn, Pandas, Numpy, OpenCV, Huggingface, ONNX, Weights&Biases, NLTK

**ML Architectures:** CNN(YOLO, ResNet, Inception), Transformers(Vision Transformers, BERT), RNN(LSTM, RNN, RCNN)

**Cloud & API tools:** Postman, AWS (Lambda, EC2, S3, SNS, SES, Sagemaker), Azure (Functions), REST, Terraform, Git, Docker

## WORK EXPERIENCE

### NLP Development Engineer

*HappSales pvt ltd, Bengaluru, India*

Sep 2019 - Apr 2022

- Developed an NLU (Natural Language Understanding) system using RASA to enable users to perform basic CRUD (Create, Read, Update, Delete) operations within the CRM application through natural language commands
- Designed user-friendly interfaces for a seamless user experience when interacting with the NLP functionalities
- Integrated the NLP engine with AWS Lambda for efficient and scalable hosting.
- Collaborated with app developers to ensure a smooth integration of the NLP solution
- Contributed to a 10-15% increase in user productivity by streamlining workflows and minimizing clicks
- Documented the NLP engine tools and common FAQs to facilitate knowledge transfer and future development efforts

## PROJECTS

- Weather Forecast** (Northeastern University, Nov 2023 - Dec 2023)  
Combined satellite imagery and weather data for a deep learning model predicting rain probability (84% accuracy) for the next two days.
- Multimodal Scene Description** (Northeastern University, Apr 2016 - Dec 2016)  
Built a custom image explanation model (92% accuracy) using attention mechanisms, optimizing inference speed by 25% with TensorRT.
- Model Evaluation and Parameter Mapping** (Northeastern University, Feb 2023 - Apr 2023)  
Analyzed data science fundamentals and used SHAP analysis to improve machine learning model performance. Authored a research article on Medium exploring bagging and boosting techniques. [Medium](#)
- Dominex** (Northeastern University, Sep 2023 - Nov 2023)  
Led development of a real-time drug development tracking app (Java) with user-friendly interfaces for data access and collaboration leveraging Object Oriented Programming concepts (OOP). Engineered cross-organization communication and reporting. [Link](#)
- IROS Manipulator Arm Challenge** (SRM, Mar 2018 - Jun 2018)  
Led development of Robotic manipulator arm for IROS Fan challenge resulting in phase 1 win. Implemented AI for fan detection (IEEE publication). [Link](#)
- Medical Telepresence** (SRM, Apr 2016 - Oct 2016)  
Designed a medical telepresence system using skeleton mapping to map user movement to robotic torso while providing virtual reality feedback. Presented the findings at BITS Pilani [Link](#)
- Quadrupedal Robot Simulation** (SRM, Jan 2018 - May 2018)  
Built a quadrupedal robot platform to study movement gaits and localization. Created a tutorial on setting up a ROS1 simulation. [Link](#)

## EXTRACURRICULAR ACTIVITIES

- Electronics domain head** in SRM Team Humanoid robotics club - Sep 2014 - Apr 2018
- Gold at Robogames San Jose** for Bipedal Robot Obstacle race - Apr 2018
- Haptic navigational shoes** designed for visually impaired and secured 2nd place at Konvolve hackathon -Apr 2018
